

NASA Glenn Research Center **Foundations and Applications of Gen AI**

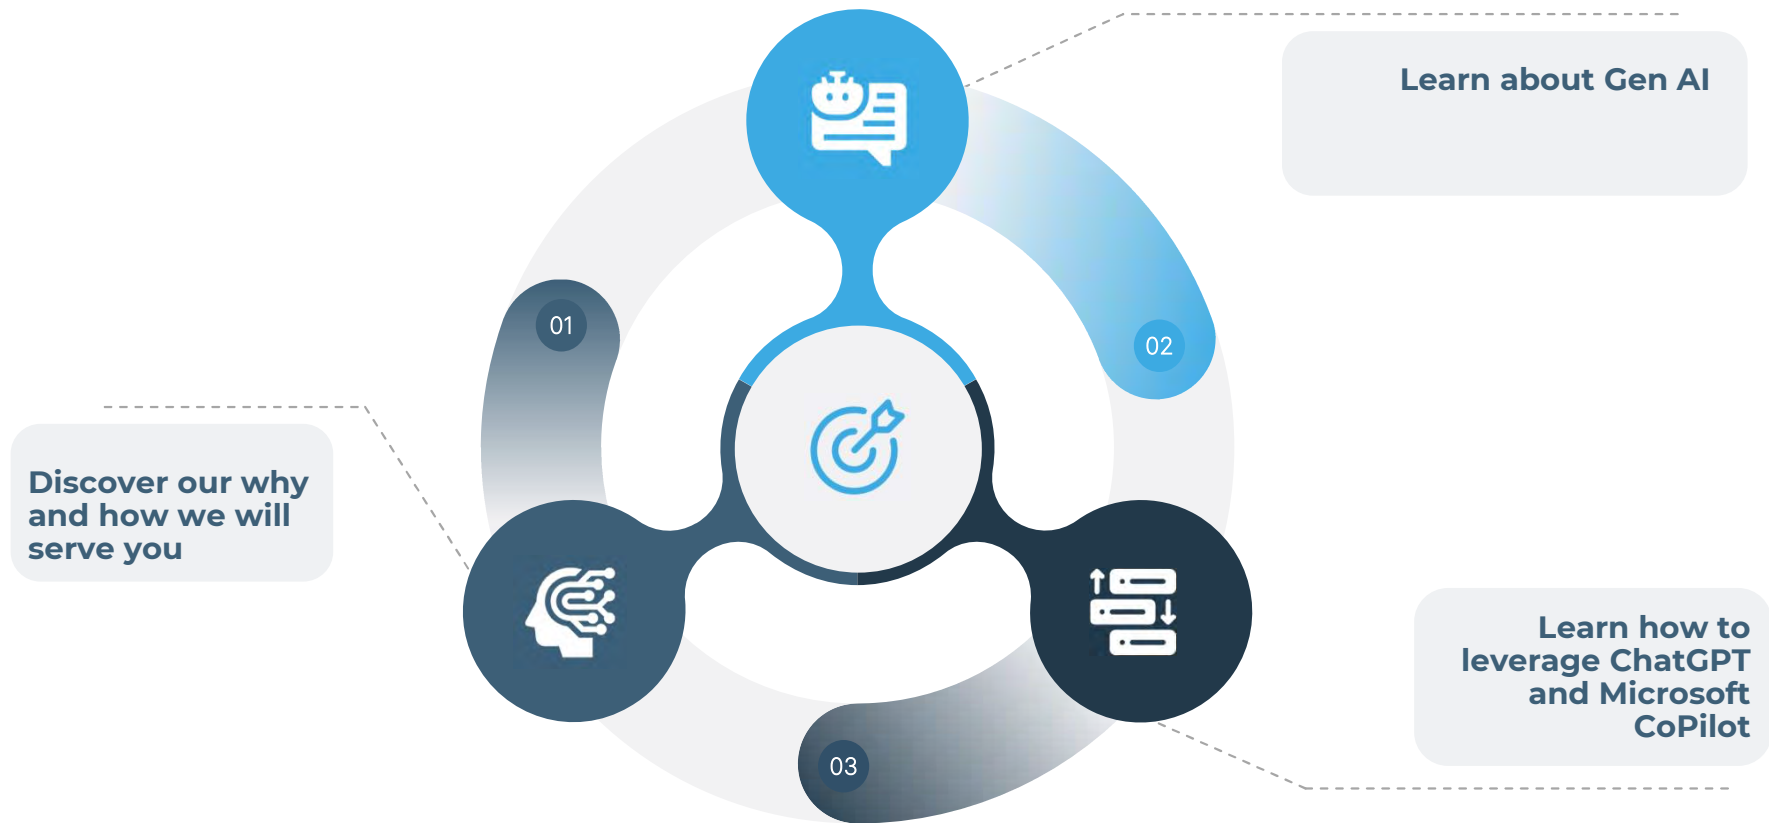

Module 1 - - Day 1
OCTOBER 22-23, 2024

Agenda

SaND)AI Global at a Glance	9:00 – 9:25
Let's Talk About Gen AI	9:25 – 9:45
Let's Talk About DataCamp	9:45 – 10:05
Break I	10:05 – 10:20
What is ChatGPT?	10:20 – 11:35
Break II	11:35 – 11:50
What is CoPilot?	11:50 – 12:35
Day-1 Wrap-up	12:35 – 1:00

Three take-aways from this training

Our Why and Service to you

SaNDAI at a Glance!

SaNDAI Global, is an innovative data and business intelligence firm, transforms sectors with cutting-edge data services. **We innovate and don't replicate.**

Our elite team of experts, each with deep industry insight, certifications, and a zeal for innovation, serves **businesses, government agencies, nonprofits, and healthcare organizations.**

PARTNERSHIP CONTACTS

JEREMY WILLIAMS, SR.

Chief Executive Officer

BS – Mechanical Engineering - Florida A&M University
MBA – Finance - University of Virginia Darden

JEREMY WILLIAMS, JR.

Director of Operations

BS – Business Administration and Data Analytics - George Mason University

WALAA JASIM

Project Manager - ASRC

BA – Spanish - University of Baghdad
MBA - Business Planning – University of Baghdad

HIBA KHAN

Marquee Tech - Owner

MbBS (International MD) – Dubai Medical College
MSc – Medical Nutrition - Stanford

CORE COMPETENCIES

Digital transformation

Data analytics/
Business intelligence

Artificial Intelligence/
Generative AI

Project Management

Training and Development

OUR DIVISIONS

SaNDAI Global: Enhancing data analytics and AI through subscription-based services.

SaNDAI Government Sphere: Supporting government leaders with scalable data management and analytics solutions.

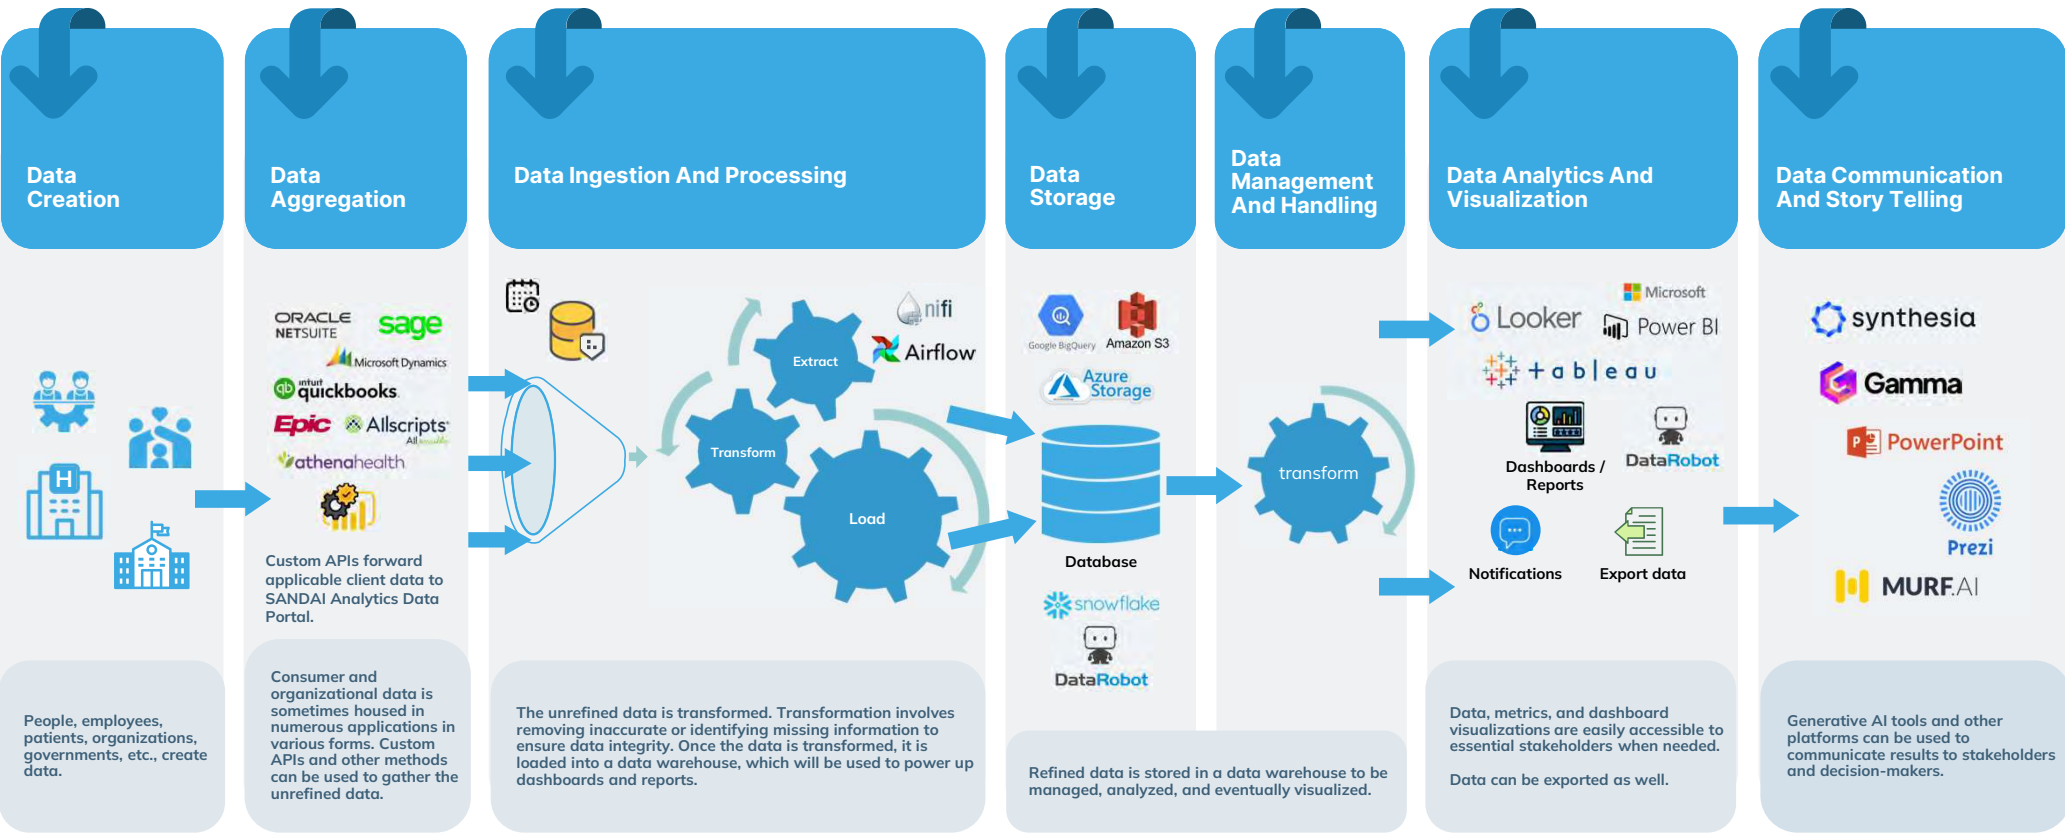

SaNDAI Cares: Empowering global nonprofit leaders through data-driven insights.

SaNDAI Learning Center: Upskilling in data analytics and generative AI for employees, the underrepresented, and students.

We Guide Clients From Data Creation To Data Communication

➔ WE TAKE PRIDE IN TRANSFORMING DATA INTO ACCESSIBLE FORMATS

Our Training Use Cases are expansive.

Custom Generative AI Training Programs

SaND)AI can collaborate with ASRC Federal to design and deliver workshops, webinars, or micro-tutorials covering over 70 generative AI tools.

Corporate Data Tutorials for Executives

SaND)AI specializes in creating tailored micro-tutorials that communicate division-specific and consolidated data to share unique insights and perspectives with corporate executives.

All SaND)AI Global Training Programs are flexible and employee-friendly. All Programs include coaching services too.

Custom Data Analytics Training Programs

SaND)AI can develop interactive micro-tutorials that enhance employee data analytics skills and allow them to stay up-to-date with the latest trends and techniques. We offer training, coaching, and micro-tutorials for Power BI, Tableau, Excel, and Google Sheets.

Custom Tutorials and Training Programs

SaND)AI can develop custom courses for AWS, Azure, and other applications like ServiceNow.

Custom AI Ethics and Compliance Training Programs

SaND)AI can provide customized training modules on AI ethics, covering topics such as bias, privacy, transparency, and responsible AI practices. Employees can learn how to navigate ethical challenges when implementing AI solutions.

Our value proposition to you!

Three in-person Training Modules

First module, we determine the content

Content for subsequent modules will be determined by you

Free Access to DataCamp to assist with ChatGPT and CoPilot learning

Data literacy and AI Fundamentals certificates possible

Weekly office hours

Ability to learn 70+ Gen AI tools

Ability to share content with others

Let's Talk About Gen AI

What is AI?

AI enables us to build amazing software that can improve health care, enable people to overcome physical disadvantages, empower smart infrastructure, create incredible entertainment experiences, and even save the planet!

Computer vision

Capabilities within AI to interpret the world visually through cameras, video, and images.

Document intelligence

Capabilities within AI that deal with managing, processing, and using high volumes of data found in forms and documents.

Generative AI

Capabilities within AI that create original content in a variety of formats including natural language, image, code, and more.

Machine learning

This is often the foundation for an AI system and is the way we "teach" a computer model to make predictions and draw conclusions from data.

Natural language processing

Capabilities within AI for a computer to interpret written or spoken language, and respond in kind.

Knowledge mining

Capabilities within AI to extract information from large volumes of often unstructured data to create a searchable knowledge store.

AI Presents Challenges

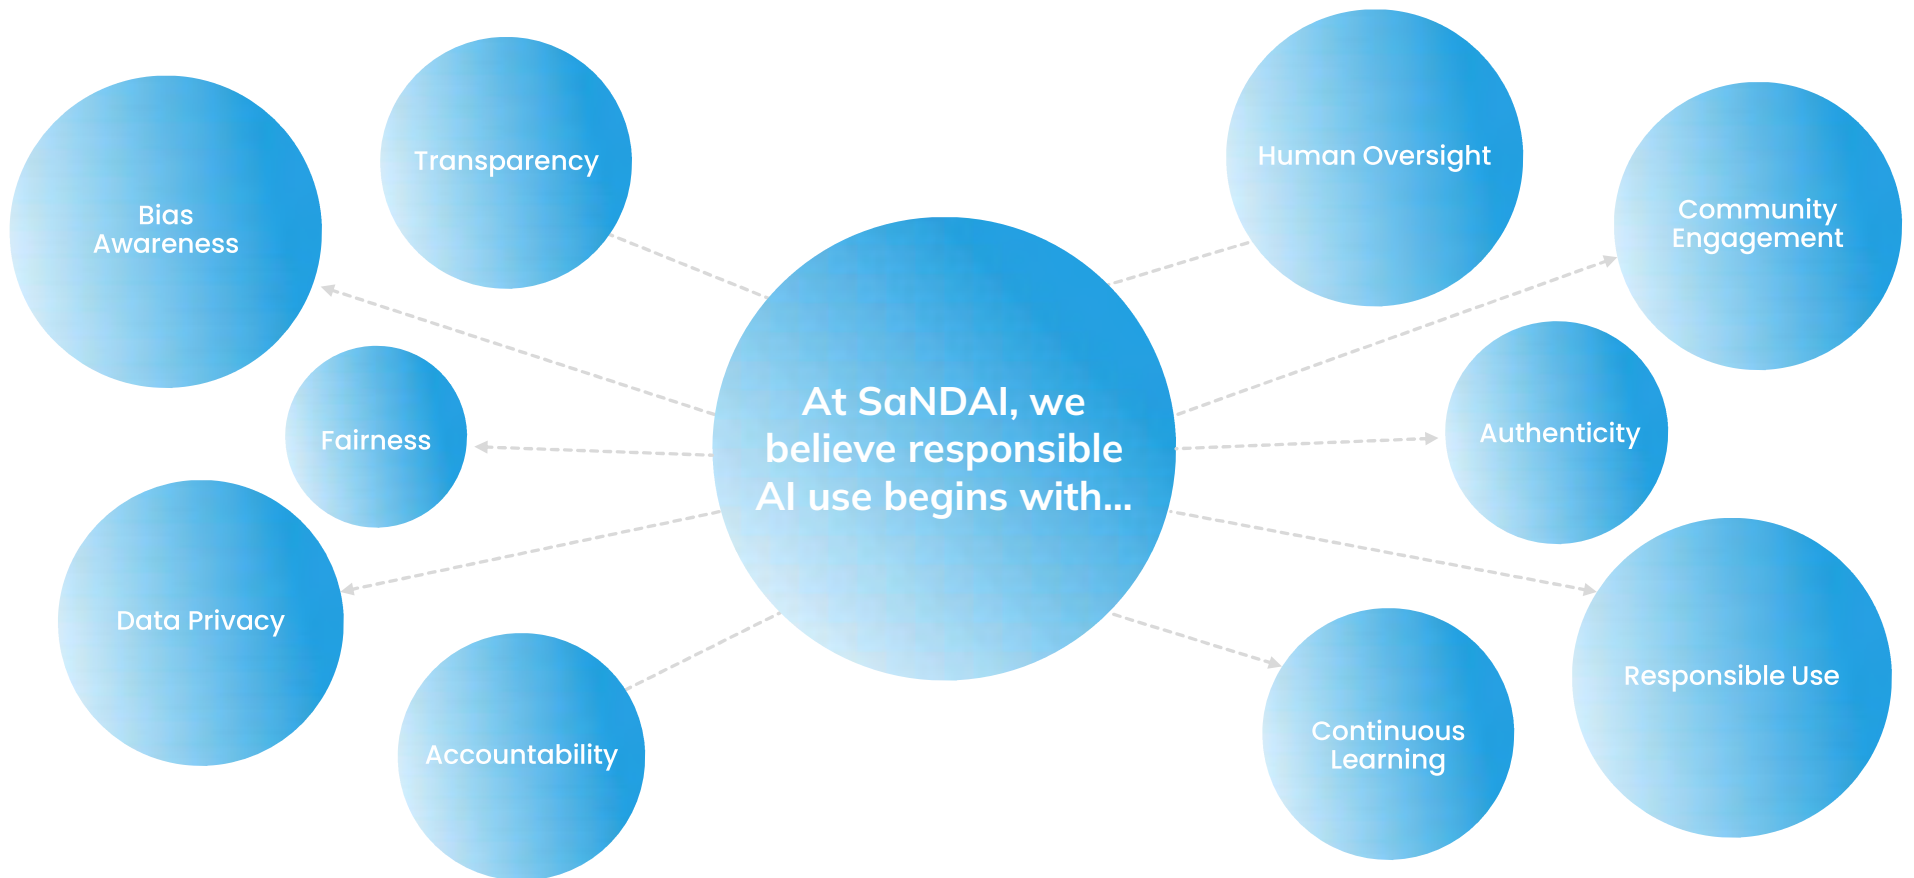

Artificial Intelligence is a powerful tool that can be used to greatly benefit the world. However, like any tool, it must be used responsibly.

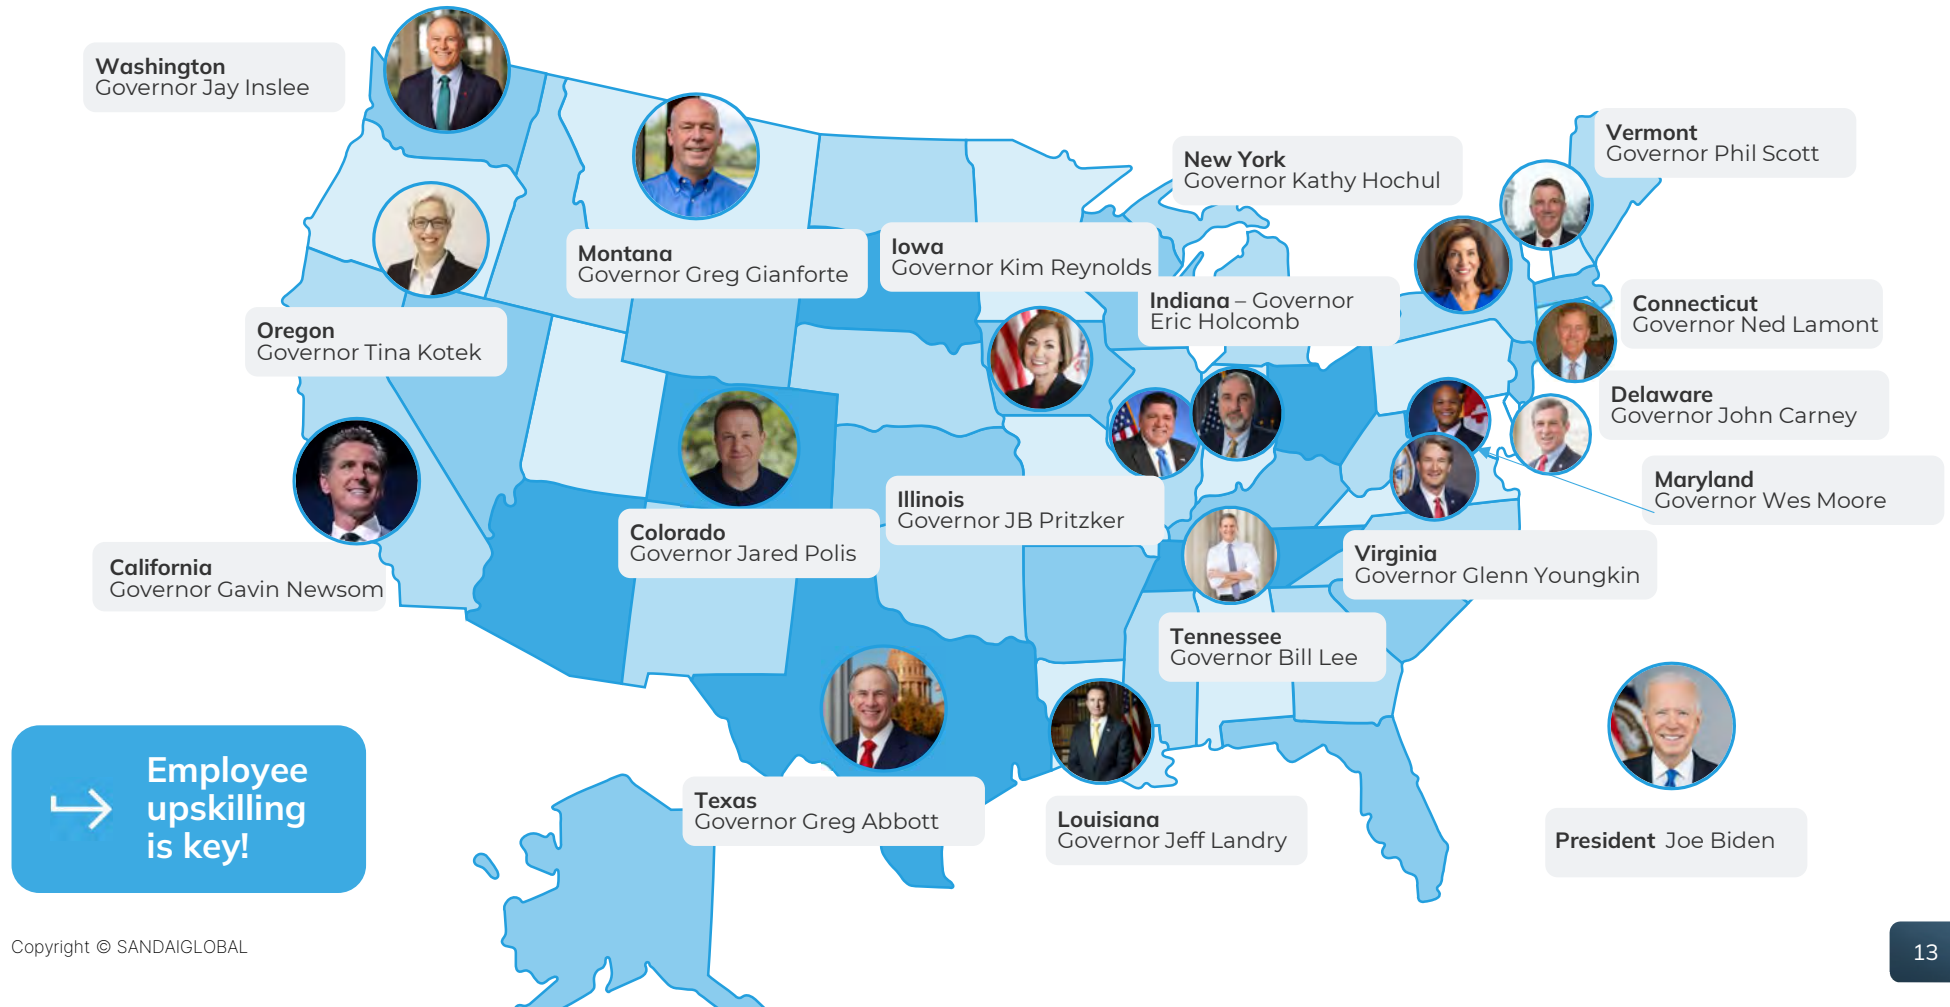

To many,
AI is scary!

Understand Responsible AI

The president and 45 governors have enacted AI legislation; most with an emphasis on worker protection

OCTOBER 30, 2023

FACT SHEET: President Biden Issues Executive Order on Safe, Secure, and Trustworthy Artificial Intelligence

BRIEFING ROOM STATEMENTS AND RELEASES

Today, President Biden is issuing a landmark Executive Order to ensure that America leads the way in seizing the promise and managing the risks of artificial intelligence (AI). The Executive Order establishes new standards for AI safety and security, protects Americans' privacy, advances

THE WHITE HOUSE

technical positions to facilitate a... use of current pay incentives;

(v) within 180 days of the date of this order, establish guidance and policy on skills-based, Federal Government-wide hiring of AI, data, and technology talent in order to increase access to those with nontraditional academic backgrounds to Federal AI, data, and technology roles;

(vi) within 180 days of the date of this order, establish an interagency working group, staffed with both human-resources professionals and recruiting technical experts, to facilitate Federal Government-wide hiring of people with AI and other technical skills;

(vii) within 180 days of the date of this order, review existing Executive Core Qualifications (ECQs) for Senior Executive Service (SES) positions informed by data and AI literacy competencies and, within 365 days of the date of this order, implement new ECQs as appropriate in the SES assessment process;

(viii) within 180 days of the date of this order, complete a review of competencies for civil engineers (GS-0810 series) and, if applicable, other

Newsom Administration Releases GenAI Report

Published: Nov 21, 2023

WHAT TO KNOW: Following Governor Newsom's September 2023 Executive Order to prepare California for the progress of Generative Artificial Intelligence, the administration releases a report examining the most beneficial uses and potential harms of GenAI in state government.

SACRAMENTO — Today, the Newsom Administration released a [report](#) outlining the state's opportunities to use Generative Artificial Intelligence (GenAI) while highlighting potential harms. This is the first of several expected reports and deliverables required by the [Executive Order](#) the Governor issued two months ago.

WHAT GOVERNOR NEWSOM SAID: "This is an important first step in our efforts to fully understand the scope of GenAI and the state's role in deploying it. We're taking a nuanced, measured approach – understanding the risks this transformative technology poses while examining how to leverage its benefits."

WHAT'S IN THE REPORT:

where GenAI can improve the efficiency, effectiveness, accessibility, and equity of government operations.

- **Beneficial Uses of GenAI Report:** Direct state agencies and departments to develop a report examining the most significant and beneficial uses of GenAI in the state. The report will also explain the potential harms and risks for communities, government, and state government workers.
- **Deployment and Analysis Framework:** Develop guidelines for agencies and departments to analyze the impact that adopting GenAI tools may have on vulnerable communities. The state will establish the infrastructure needed to conduct pilots of GenAI projects, including California Department of Technology approved environments or "sandboxes" to test such projects.
- **State Employee Training:** To support California's state government workforce and prepare for the next generation of skills needed to thrive in the GenAI economy, agencies will provide trainings for state government workers to use state-approved GenAI to achieve equitable outcomes, and will establish criteria to evaluate the impact of GenAI to the state government workforce.
- **GenAI Partnership and Symposium:** Establish a formal partnership with the University of California, Berkeley and Stanford University to consider and evaluate the impacts of GenAI on California and what efforts the state should undertake to advance its leadership in this industry. The state and the institutions will develop and host a joint summit in 2024 to engage in meaningful discussions about the impacts of GenAI on California and its workforce.

**GenAI is changing
nearly every industry**
and will impact society in ways we
are just beginning to understand

The GenAI industry is on the cusp of remarkable growth!

According to Bloomberg growth is set to surge from a valuation of \$40 billion in 2022 to an estimated \$1.3 trillion in the coming decade.

Understanding Generative AI

Generative AI describes a category of capabilities within AI that create original content. People typically interact with generative AI that has been built into chat applications.

Generative AI applications take in natural language input and return appropriate responses in a variety of formats including natural language, image, code, and audio.

Generative AI is fun!

Unfortunately, there are too many generative AI technologies to learn

Let's Talk About DataCamp

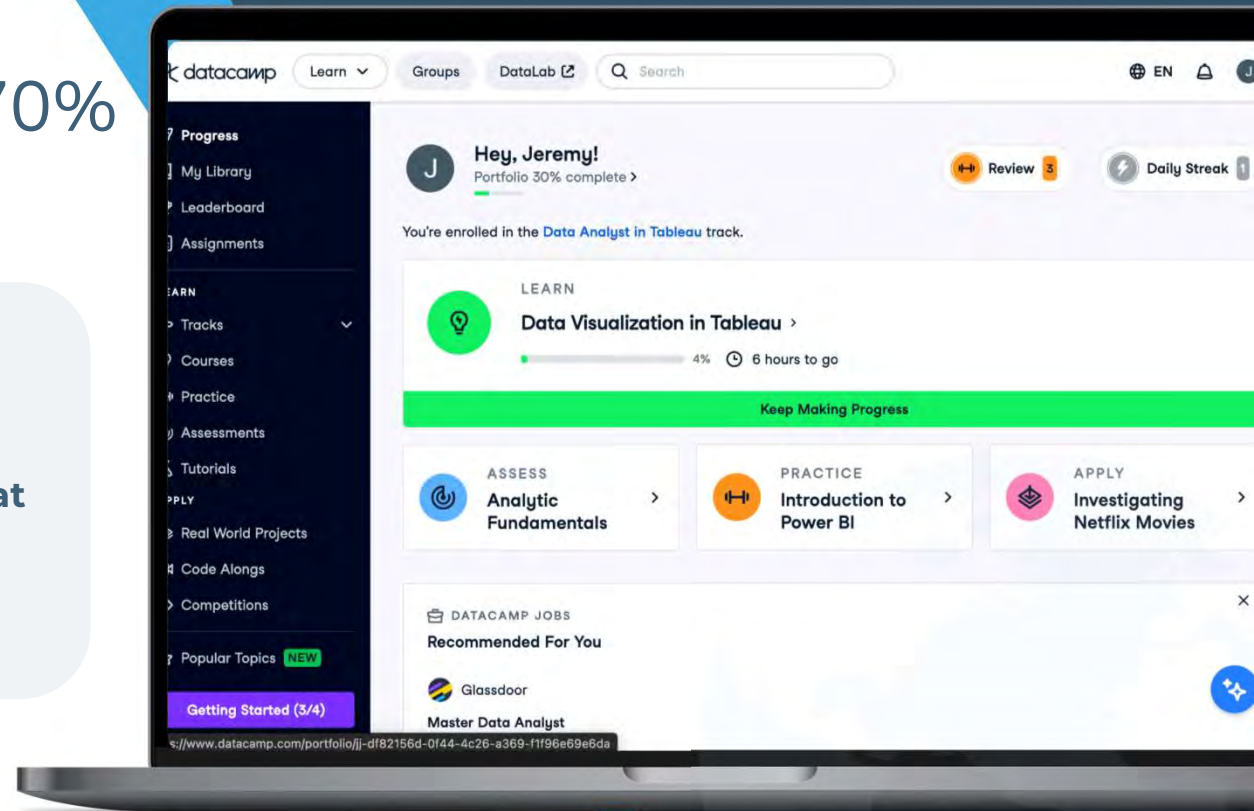

DataCamp is used by 70% of the Fortune 100.

Consists of 400+ courses

You can learn at your own pace

Data literacy and AI Fundamentals certificates

What is ChatGPT?

Who is OpenAI, and what is its mission?

The company behind ChatGPT. One of the world's leading AI research organizations established in 2015 by a group of entrepreneurs, researchers and tech visionaries including Elon Musk and Sam Altman, with the goal of developing safe, beneficial and accessible AI tools for all.

NASA and OpenAI share similar core values

1. Safety
2. Transparency
3. Collaboration
4. Mutual benefit

While exploring new frontiers be it in Aerospace science or AI technology!

WHAT IS ChatGPT?

- A conversational AI model that generates human-like text

How is it different from other search engines like Google?

Capabilities:

- literature research and reference
- communication
- content and idea generation
- problem-solving, and so much more!

Key Features:

- **Context-Aware Responses:** it remembers what has been said earlier in the conversation
- **Real-Time Adaptation:** adapts its responses based on how users interact with it

ChatGPT has many cross-sector applications!

Potential ChatGPT Applications at NASA

For Engineers: Drafting technical documents, troubleshooting, code review, generating simulations.

For Facilities Personnel: Automating maintenance schedules, tracking inventory, managing logistics, and answering routine queries.

For Mission Planning and Support: Automating documentation, providing data insights, and offering suggestions.

Tips for Creating Effective Prompts

Start Simple:
Begin with basic requests, then build up complexity.

Experiment:
Test different approaches to find the most effective phrasing.

Use Follow-ups:
If the initial response isn't quite right, ask follow-up questions or provide more details.

ChatGPT Demo and Case Study

Section 3: What is CoPilot?

Microsoft Copilot: A Journey of AI Integration

INTEGRATION IN MICROSOFT 365 MARCH (2023)

It was integrated into Microsoft 365 applications such as Word, Excel, PowerPoint, Outlook, and Teams, offering AI-powered assistance to boost productivity through natural language inputs and task automation.

LAUNCHED JUNE (2021)

At that time, GitHub Copilot was primarily used for code suggestions, debugging assistance, writing tests, providing code explanations, generating regular expressions, and conducting code reviews.

POWERED BY OPENAI'S GPT MODEL (2023-2024)

Copilot utilizes OpenAI's advanced GPT models, including GPT-4, to understand context, generate human-like responses, and handle complex tasks such as content creation, data analysis, and project management.

“Unlock Copilot’s Capabilities: From Simple Edits to Complex Projects”

Machine Learning is the foundation for most AI solutions

1. Simple Tasks: Summarize documents, draft proposals, and compose email responses.
2. Moderate Tasks: Summarize budget sheets, generate PowerPoint presentations, and create basic reports
3. Complicated Tasks: Produce comprehensive reports with citations and perform detailed data analysis.

Microsoft Copilot

The AI-driven assistance provided by Microsoft Copilot has far-reaching implications across various industries, including its transformative impact on NASA's operations. Here are some specific applications and the impact it has on NASA.

Key Features in Microsoft Word

Smart Writing Assistance: Copilot offers grammar and style suggestions, helps with rephrasing sentences, and ensures your writing is clear and concise.

Content Summarization

Copilot can generate summaries of long documents, making it easier to digest key points

Key Features in Microsoft PowerPoint

Slide Design Suggestions: Based on the content, Copilot can recommend design templates, layouts, and visuals to enhance the presentation.

Automated Slide Generation

Copilot can create slides from a given outline, ensuring consistency and saving time.

Key Features in Microsoft Excel

Formula Suggestions: Copilot can recommend and correct formulas, ensuring accuracy in calculations..

Predictive Analysis

Copilot can perform advanced data analysis and provide insights into future trends.
