

SaNDALI's 7 Steps to Smarter Data

From Data Creation to Data Communication

1

Data Creation – Collect what matters most

Set up simple, consistent ways to gather the right information for your mission — like surveys, intake forms, or digital sign-ups.

You get:

A clear data plan and easy-to-use templates.

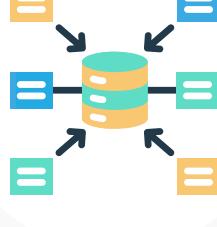

2

Data Aggregation – Bring it all together

We connect your spreadsheets, forms, and systems into one secure “data hub.”

You get:

One place to see everything in real time.

3

Data Processing – Clean and organize

We remove duplicates, fix errors, and make sure your numbers tell a consistent story.

You get:

Clean, trustworthy data you can rely on.

4

Data Storage – Keep it safe and accessible

Your data is stored securely in the cloud or on-site — protected, organized, and easy to reach.

You get:

Peace of mind and quick access when needed.

5

Data Management – Stay private and compliant

We help you manage who can see what and make sure you follow privacy and sharing rules.

You get:

A simple, safe policy for responsible data use.

6

Data Analytics & Visualization – See what's working

Turn your information into easy-to-read dashboards that show progress, trends, and impact.

You get:

Clear visuals that help you tell your story to boards, funders, and the community.

7

Data Communication & Storytelling – Share your impact

We help you turn data into stories — through reports, one-pagers, and infographics that inspire action.

You get:

Ready-to-share visuals for funders, newsletters, and social media.

FROM CREATION TO COMMUNICATION

EVERY DATA POINT TELLS YOUR STORY
