

## SaND AI Data Safety Guide

# YOUR DATA. YOUR CONTROL. OUR PROTECTION.

At SaND AI, we believe data is one of your most valuable assets — and it should always be handled with the highest level of care. Our approach to data privacy and security is simple, transparent, and built around your organization's needs.

Your data belongs 100% to you.  
We never sell it, share it, or use it for any purpose other than the work you've asked us to support.

## OUR DATA SAFETY PRINCIPLES

### 01 You Stay in Control

Your team decides:

- Who can access which dashboards
- What data can be viewed or edited
- When access is granted or removed

We set up simple, clear permission levels so everyone only sees what they need — nothing more.

### 02 Your Sensitive Information Is Protected

We use modern security practices to keep your data safe, including:

- Encryption for sensitive and personal information
- Secure cloud environments
- Regular system updates and security checks
- Safe methods for transferring data

Whether you work with program data, youth information, participant records, or donor details — everything stays protected.

### 03 You Stay Compliant

We help you meet all necessary federal, state, and partner requirements, including:

- HIPAA (health data)
- FERPA (education records)
- State-level privacy regulations
- Grant and funder reporting requirements
- Safe data-sharing practices

No jargon. No overwhelm.  
Just simple guidance you can understand and apply right away.

### 04 We Build With Privacy in Mind

Every BI dashboard and AI agent is designed with safeguards built in:

- Audit logs
- Access controls
- Data minimization
- Clear approval workflows
- Ethical AI guardrails

You always know what data is being used, how it's being used, and why.

## 05 You Get a Simple, Custom Safety Plan

Every engagement includes:

- A basic data governance guide
- A permissions chart
- A privacy checklist
- Safe data-sharing recommendations
- A list of what to do (and avoid) moving forward

We make data safety easy, not intimidating.

## SANDAI'S PROMISE TO YOU

- 01 Your data is yours — always.
- 02 We keep everything safe, secure, and compliant.
- 03 We use plain language and simple steps.
- 04 We design systems that protect your staff, your participants, and your mission.

## WANT US TO REVIEW YOUR CURRENT DATA SAFETY SETUP?

We can provide a quick, free assessment as part of your BI Discovery Call.
